**Description** | Digital Access | List Contents

**Your IES standards, wherever you need them.** The enhanced IES Lighting Library brings subscriptions, leases, and purchases into one easy to use browser-based collection, available on two personal devices. View and annotate standards on your computer, tablet, or phone, with offline browser access when you need it.

**One connected IES knowledge platform.** The Lighting Library, Illuminance Selector, Reference Retriever, and Document Comparison capabilities come together in one experience, with IES Lens helping connect questions to relevant standards, tables, references, and source material.

**IES standards remain the source.** Lighting Library content is authoritative, human-authored IES technical information developed through consensus by volunteer subject matter experts. IES Lens helps you navigate that content with confidence.

**Find information your way.** Browse standards directly, filter content by topic, or search using natural language. IES Lens can interpret your question, surface relevant excerpts, definitions, references, and illuminance recommendations, and link you directly to the source within the Lighting Library.

**Answers connected to the source. Always.** IES Lens works exclusively with IES technical content. Results include referenced excerpts and direct links to the relevant pages of IES standards, so you can review the source and its full context yourself.

**AI assistance is optional.** IES Lens is included with a Lighting Library subscription at no additional cost, but you remain in control of how you access IES content. Browse and search the Lighting Library with or without AI-assisted guidance and result curation through IES Lens.

**ANSI/IES RP-6-24** *Recommended Practice: Lighting Sports and Recreational Areas*

**Description:** The purpose of this Recommended Practice (RP) is to provide the reader with recommendations to aid in the design of sports lig systems. Popular sports such as baseball, tennis, basketball and foo well as recreational social activities such as horseshoe pitching and are covered. Venues for spectators of amateur, collegiate, and profe sports are complex facilities that should provide not only for the sp but also the equipment used in modern sports broadcasting. This does not address the needs of broadcasting; for this, the reader sh for guidance from the sports league or the project consultant.
