1. User exports xfdf file with Vitrium tool
2. User drags the file into either the AI Chat window or another tool on our end
3. Our script parses the annotations and exports a PDF or Excel file similar to below:
 - *Note: sort by Page #, then by Modified (newest > oldest)*
 - *Note: normalize date/time*
 - *Note: truncate "Referenced Text" to the first 150 characters*
